Notes: Beginning with fiscal year 2000, a footnote will be added when the "% change from Prior Fiscal Year" changes by 20% or more.

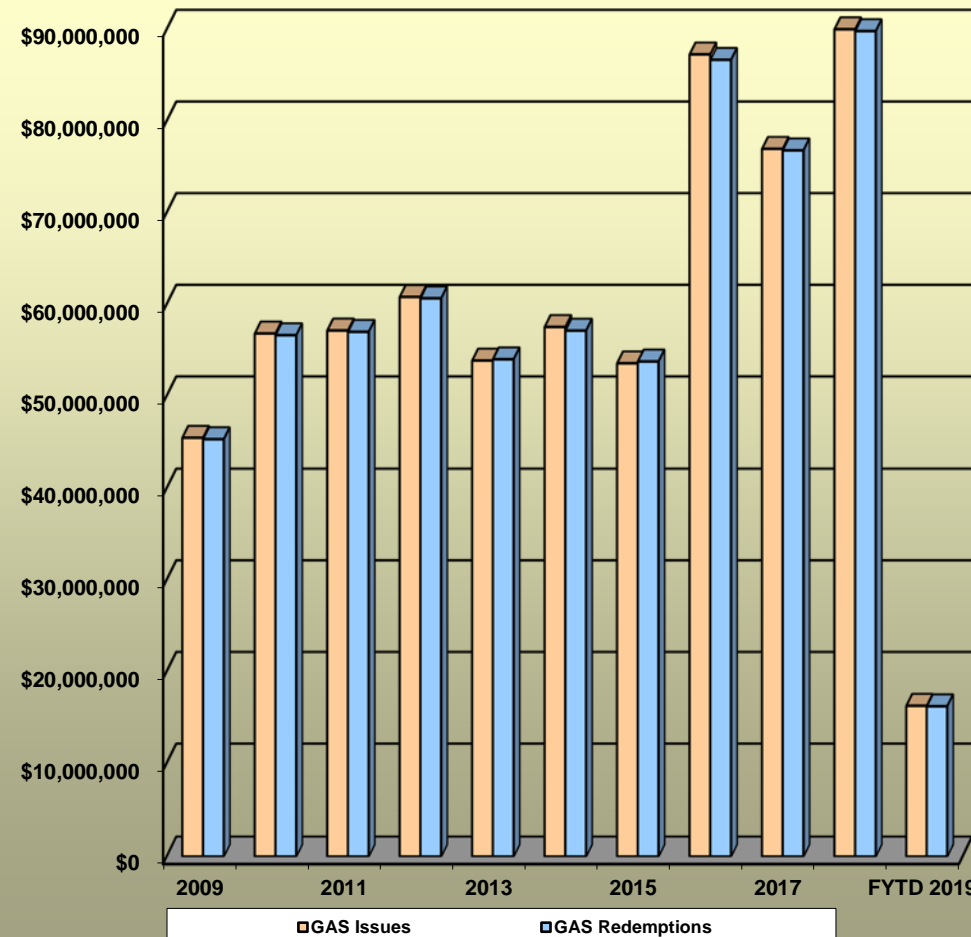

- (1) During the fiscal year, changes in economic conditions resulted in the need for an increase in borrowings from the public to finance federal spending. This increase is primarily a result of the federal government's response to the financial market crisis and the economic downturn.
- (2) During the fiscal year, the increase is primarily a result of reduced federal revenues and the federal government's response to the financial market crisis and the economic downturn.
- (3) Fiscal year 2016 shows a significant increase as compared to the previous year due to the delay in raising the debt limit that occurred in fiscal year 2015. On November 2, 2015, the Bipartisan Budget Act (Public Law No 114-74) was enacted suspending the debt limit through March 15, 2017.
